

Errata Sheet for 2002 Public Data Release

Note: EPA's TRI Program implements data quality checks to identify potential facility reporting errors. The following information reflects known facility reporting errors that were identified at the state level and notes revisions that may affect the top ranked facilities. Revisions for reporting errors received by EPA after April 1, 2004 are not reflected in EPA's on-line tool TRI Explorer.

New York

Alcan Aluminum Corporation reported 900.6 grams of dioxin and dioxin-like compounds for total disposal or other releases on-site in error. The facility submitted a revision for a corrected amount of 1.99 grams.

Danskammer Generating Facility's report contained a reporting error due to lack of certification signature. The facility submitted a certification signature on 06/03/2004. Due to this error, Danskammer Generating Facility's report does not appear in TRI Explorer.

Texas

One facility, O.W. Sommers/J.T. Deely/J.K. Spruce Generating Complex, reported 311,020 grams of dioxin and dioxin-like compounds for total disposal or other releases on-site in error. The facility submitted a revision for a corrected amount of 0.73 grams.
